

# Stone Ridge Diversified Alternatives Fund

Class J | SRDBX

Annual Shareholder Report | October 31, 2024

This annual shareholder report contains important information about the Stone Ridge Diversified Alternatives Fund for the period of November 1, 2023, to October 31, 2024. You can find additional information about the Fund at <https://www.stoneridgefunds.com/multi-strategy.html>. You can also request this information by contacting us at 1-855-609-3680.

## WHAT WERE THE FUND COSTS FOR THE PAST YEAR? (based on a hypothetical \$10,000 investment)

Class Name	Costs of a \$10,000 investment <sup>(1)</sup>	Costs paid as a percentage of a \$10,000 investment
Class J	\$243	2.37%

(1) Expenses are equal to the share class's expense ratio of 2.37%, multiplied by the average account value over the year.

## HOW DID THE FUND PERFORM LAST YEAR AND WHAT AFFECTED ITS PERFORMANCE?

For the 12-month period ended October 31, 2024, the Fund's Class J shares had a total return of 5.16%. The Fund seeks to generate positive returns through exposure to a diversified set of risk premiums, including reinsurance, market risk transfer, style premium investing, alternative lending, single family real estate, and art. The reinsurance risk premium strategy seeks to generate returns by investing in insurance-linked securities that provide counterparties protection against catastrophic events such as hurricanes or other natural disasters. The market risk transfer strategy seeks to generate returns through the sale of delta-hedged call and put options that provide counterparties with protection against changes in the market price of various assets such as oil or wheat. Style premium investing seeks to generate returns by investing in assets with certain well-known risk characteristics such as value, momentum and carry that have historically rewarded investors with higher returns. The style premium strategy generally holds both long and short positions to gain exposure to the desired risk characteristics. Alternative lending seeks to generate returns by buying and selling consumer loans, small business loans and student loans originated through non-traditional lending marketplaces. Single family real estate seeks to generate returns by investing in securities related to single family rental homes. Art seeks to generate returns by investing primarily in paintings, sculptures or other artistic objects from the Post-War and Contemporary collecting periods (1945-present) as well as other collecting periods.

## WHAT FACTORS INFLUENCED PERFORMANCE

As discussed above, during the fiscal year ending October 31, 2024, the reinsurance strategy was the largest positive contributor to fund returns. Positive performance was a function of two concurrent market dynamics: a substantial rise in reinsurance premiums as a result of losses experienced from Hurricane Ian in 2022 as well as a supply-demand imbalance for capital in the reinsurance industry. The alternative lending and single family real estate strategies were also positive contributors.

The style premia strategy was a negative contributor to Fund returns, with the commodity value and FX value styles the largest negative contributors to returns, while the commodity momentum style provided some positive offset. The market risk transfer strategy was also a modest negative contributor to Fund returns. The art strategy was not materially impactful to fund returns in the fiscal year.

## PERFORMANCE COMMENTARY

During the fiscal year ending October 31, 2024, the reinsurance strategy was the largest positive contributor to fund returns. Positive performance was a function of two concurrent market dynamics: a substantial rise in reinsurance premiums as a result of losses experienced from Hurricane Ian in 2022 as well as a supply-demand imbalance for capital in the reinsurance industry. Despite five landfalling hurricanes in the U.S. during the 2024 hurricane season (including major Hurricanes Helene and Milton), the combination of generationally-high premiums earned during the year and higher deductibles for reinsurance contributed to the strong performance for the Diversified Alternatives Fund during the fiscal year. The alternative lending strategy was a positive contributor to returns as inflation moderated and the benefit of

tightened credit standards on newly originated loans was realized, resulting in delinquency rates that were in line with or lower than expectations. Single family real estate was a positive contributor to fund returns as macro-economic factors such as moderating inflation and a stable unemployment rate provided support for continued payment of single family rents.

## HOW DID THE FUND PERFORM SINCE INCEPTION?\*

The \$500,000 chart reflects a hypothetical \$500,000 investment in the class of shares noted and assumes the maximum sales charge. The chart uses total return NAV performance and assumes reinvestment of dividends and capital gains. Fund expenses, intermediary fees, management fees and other expenses were deducted.

### CUMULATIVE PERFORMANCE (Initial Investment of \$500,000)

### ANNUAL AVERAGE TOTAL RETURN (%)

	1 Year	Since Inception (04/30/2020)
<b>Class J (without sales charge)</b>	5.16	9.22
<b>ICE BofA US 3-Month Treasury Bill Total Return Index</b>	5.39	2.43
